ABOUT THE SPECIAL SESSION

The Special Session **"Emerging Technologies for Electric Mobility, Solar PV Optimization and Grid Integration (ET-EMBRIDGE-SP)"** addresses the growing opportunities created by the rapid rise of electric vehicles (EVs) and renewable-energy systems. It offers a platform for researchers, academics, industry professionals, and students to share advances in sustainable electric mobility and renewable-energy-integrated systems.

Key topics include EV charging (plug-in and wireless), power converters (AC–DC and DC–DC), battery management, regenerative braking, bidirectional power conversion, vehicle-to-grid/home (V2G/V2H), and grid-integrated charging infrastructure, with a focus on efficient converters, power quality, energy management, and smart charging.

TOPICS OF INTEREST

- **EV charging technologies (plug-in and wireless / WPT)**
- **AC–DC and DC–DC power converters**
- **Battery management systems**
- **Regenerative braking**
- **Bidirectional power conversion (including V2G / V2H)**
- **Grid-integrated charging infrastructure**
- **Power quality, energy management, and smart charging**
- **Solar PV systems, optimization, and renewable-energy grid integration**
